

Slide Show

Slide Show allows a number of pictures or photographs to be linked together to be form a movie which can be displayed in Slide show or in Wacky TV in Kid Pix.

Each lorry has three buttons.

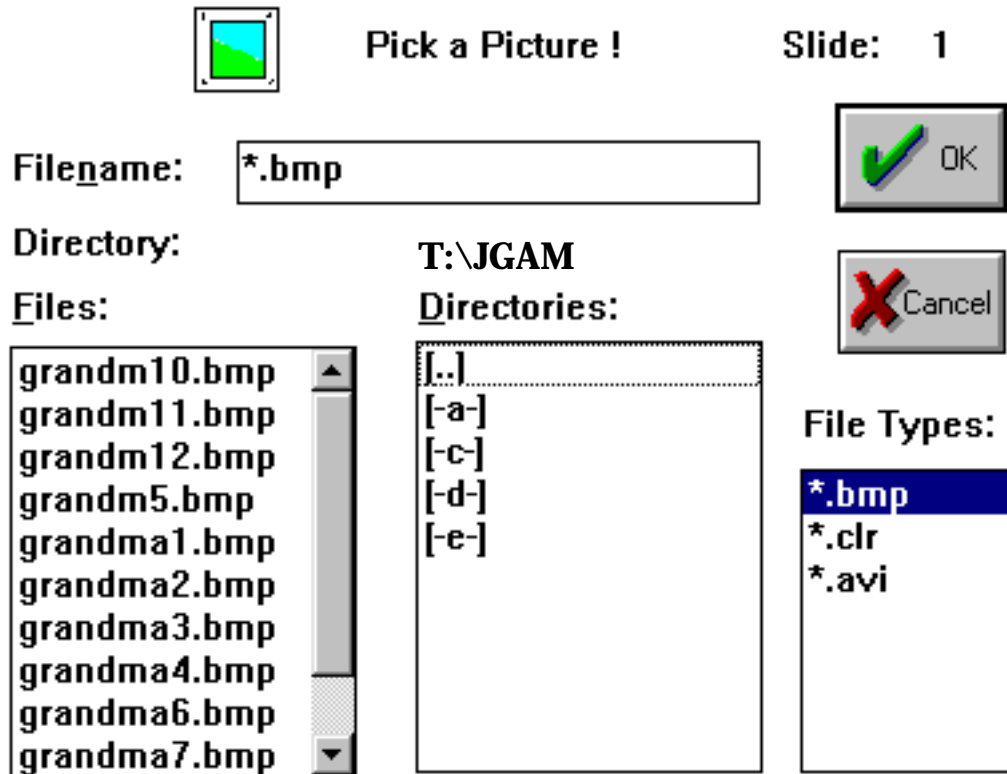

- 1/.  Add a picture
- 2/.  Pick a sound
- 3/.  Pick a transition

Add a picture

On Drive T: there is a folder called **JGAM** which has a series of pictures which have been taken off the CD Just Grandma and Me. Children will be able to make their own story version of the CD. (The script can be printed out in ClarisWorks).

Click on **OK** to add a picture.

Pick a sound.

Your own sounds can be recorded.

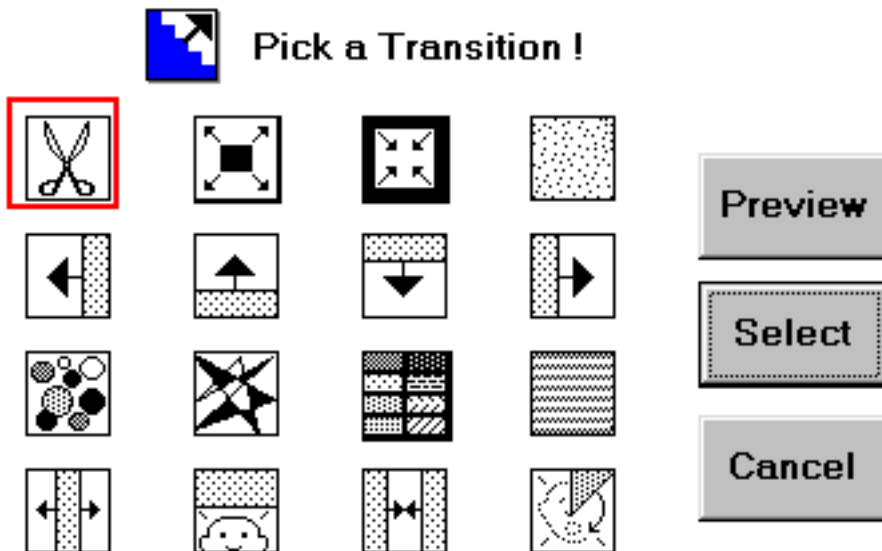

If sound has been added to a picture in Kid Pix it will be automatically loaded.

Pick a transition

A transition is the way one picture changes into another picture. It could be a fade or a straight cut.

Saving the movie (File - Save As)

Give the slide show a name.

To save the Slide Show as a film select the button which shows QuickTime™ movie.

Extension activity

After a sequence has been saved correctly you may like to jumble up the presentation by pressing the mouse down and dragging the pictures around.

Save the new sequence with a new name.

A child loads the jumbled sequence and has to correctly order the pictures using visual or oral clues. This type of activity works very well with story telling or the life cycles of the butterfly or frog.
